INDEX TO ILLUSTRATIONS

Algol, Light curves of..... 384
American Association of variable star observers, Cambridge, Mass., November 10, 1917, Plate II.....Op. 64
Astronomical Society, Members and visitors at the Harvard meeting, Aug. 20 to 22, 1918, Plate XXV (with key).....Op. 589
Asteroid, Diagram of the orbit of Wolf's..... 267
Astronomical problems, Diagrams for solving.....614, 615, 621
Barnard, Edward Emerson, Plate I.....Op. 1
Buttes at Green River, Wyoming, The small, Plate IV.....Op. 104
Camille Flammarion, Observatory of, Plate VII.....Op. 145
Canum Venaticorum, The star cluster M 3, Plate III.....Op. 81
"Castle Rock" above Green River, Wyoming, Plate V.....Op. 106
Celestial dancers at the nativity (Botticelli)..... 327
Comet among the stars, Apparent path of Borrelly's..... 719
Constellation Charts.....59, 122, 193, 260, 338, 410, 484, 562, 638, 705
Corona June 8, 1918, at Matheson, Colorado, *Edison Pettit*, Plate XVIII..Op. 476
Plate XIX...Op. 477
Plate XX (Drawing) Op. 380
Drawings of the, by members of the Salt Lake Party... 524
Near Green River, Wyoming, *Alfred Rordame* 521, 522, 523
Photograph of the, at Matheson, Colorado, *D. W. Morehouse*, Plate XVII.....Op. 449
Eclipse, Annular, of December 3, 1918 (diagram)..... 52
camera, Mr. Rordame's..... 520
expedition to Rock Springs, Wyoming, Views of the Illinois..... .....667, 668, 670, 671, 672, 673
of the sun, June 8, 1918, Path of the total, Plate XIII.....Op. 285
path of June 8, 1918, across Colorado, Kansas, Oklahoma.....398, 399
station at Matheson, Colorado, Views of equipment of Edison Pettit, ...468, 471, 472, 473
of the Minnesota party, Fraser, Colorado..... 448
Total solar, of June 8, 1918, (diagram)..... 51
May 28, 1900, *H. C. Wilson*, Plate XIV.....Op. 288
track, Views in Oregon near the, Plate VIII and IX.....Op. 176
Jupiter, Apparent path of, among the stars in 1918..... 54
Orbits of satellites of, in 1918..... 56
Liknophoria Ritual, The..... 232
Mars, Apparent path of, among the stars in 1918..... 54
Diagrammatic drawings of, *W. H. Pickering*.....37, 38, 316
in 1911 and 1914, *Latimer J. Wilson*, Plate XV.....Op. 429
in 1918, *Latimer J. Wilson*, Plate XVI.....Op. 432
Orbits of satellites of, in 1918..... 55
Mercury and Venus among the stars in 1918, Apparent paths of..... 53
Meteor of January 22, Chart of observations of the..... 277
Mithraic Cameo 235
Moon, Umbra, and Penumbra, Comparative sizes of the..... 95

Moon's shadow and path across earth, Plate XIII....Op. 285
drawings illustrating the path of the....97, 98, 99
Morehouse, D. W., Photograph of the corona, June 8, 1918, at Matheson, Colorado, Plate XVII....Op. 449
Nativity, (Gentile de Fabriano).... 330
Nebula in Monoceros, The variable, Plate XI....Op. 249
M 64, *Comae Berenices*, The spiral, Plate XXI....Op. 544
N. G. C. 1068, The spiral, Plate XII....Op. 281
Neptune, Apparent path of, among the stars in 1918.... 54
Orbit of satellite of, in 1918.... 57
Nova Aquilae III, After and before the outburst, Plate XXII....Op. 560
Light curve of.... 490
Photographs of, taken at Harvard College Observatory, Plate XXIII....Op. 561
Region around, Photograph at Yerkes Observatory, Plate XXIV....Op. 588
of 490
Observatory of Camille Flammarion, Plate VII....Op. 145
The Chamberlin, of the University of Denver, Plate IV....Op. 104
Winter scene at Yerkes, Plate X....Op. 217
Pettit, Edison, Views of equipment of eclipse station at Matheson, Colorado, ...468, 471, 472, 473
Photometer, A new form of stellar.... 380
Pickering, W. H., Diagrammatic drawings of Mars....37, 38, 316
Planets, Apparent paths of the, among the stars in 1918....53, 54
Planisphere of Denderah.... 158
Pleiades dance.... 154
Reflecting telescope, The (diagram)....526, 529, 532, 535, 538
Reflector Mounting....147, 148
Rigge, William F., Occultation of π Sagittarii....375, 376
Rordame, Alfred, The Corona June 8, 1918, near Green River, Wyoming, ...521, 522, 523
π *Sagittarii*, Occultation of, *William F. Rigge*....375, 376
Saturn, Apparent path of, Among the stars in 1918.... 54
Orbits of satellites of, in 1918.... 56
Secchi, Father Angelo.... 589
Simla and Matheson, Colorado, View of landscape between, Plate VI....Op. 108
Colorado, Looking north from, Plate VI....Op. 108
Spiral nebula M 64, *Comae Berenices*, The, Plate XXI....Op. 544
N. G. C. 1068, The, Plate XII....Op. 281
Star Cluster M 3, *Canum Venaticorum*, The, Plate III....Op. 81
Stars in the vicinity of the sun at time of eclipse, June 8, 1918, Chart of the.. 289
Stellar photometer, A new form of.... 380
Telescope and cameras at Matheson, Colorado, The Drake University.... 552
Miss Gushee's home-made.... 256
Uranus, Apparent path of, among the stars in 1918.... 54
Orbits of satellites of, in 1918.... 57
Variable nebula in Monoceros, The, Plate XI....Op. 249
star observers, Photograph of the American Association of, at Cambridge, Mass., November 10, 1917, Plate II....Op. 64
Venus among the stars in 1918, Apparent paths of Mars and.... 53

Wilson, H. C., The total solar eclipse of May 28, 1900, Plate XIV.....Op. 288
Wilson, Latimer J., Mars in 1911 and 1914, Plate XV.....Op. 429
1918, Plate XVI.....Op. 432
X *Camelopardalis*, Mean light curve of..... 493
χ *Cygni*, Mean light curve of..... 494
Zenith equatorial, The (drawing)..... 239
Zodiacal Light, (diagrams) 114, 115, 584

GENERAL INDEX TO VOLUME XXVI

Abbott, C. G., The Smithsonian solar constant observatory at Calama, Chile (abstract) 633
Adams, W. S., Spectroscopic observation of W *Ursae Majoris* (abstract).... 634
Aitken, Robert G., The orbit of Sirius (abstract)..... 634
Spectral classification of 3919 visual binary stars (abstract) 635
Albrecht, Sebastian, Personality in the estimation of tenths (abstract)..... 637
Allegheny Observatory, Determinations of stellar parallax at the, *Frank Schlesinger* 6
American Association of variable star observers,—
Charter members of the..... 274
Monthly report of the, *William Tyler Olcott*.....
.....63, 129, 202, 268, 344, 414, 495, 569, 646, 713
astronomical society 507, 585
Report of the twenty-first meeting..... 6
twenty-second meeting.....630, 683
Anchusa, If I were spoiler of the skies (Poem)..... 676
Andromeda nebula, Parallax of the..... 663
Rotation and radial velocity of the..... 722
Answer, The, *Sylvia Cushman*..... 391
Asteroid and possible telescopic comet, A faint, *William H. Pickering*..... 422
Elements of Wolf's 343
instead of a comet, An..... 62
of Feb. 4, Wolf's 266
Asteroids discovered by Joel H. Metcalf..... 62
Astrographic catalogue, Hyderabad..... 587
Astrometry, Report of the chairman of the committee on photographic, *Frank Schlesinger* 15
Astronomer, The, *B. L. Taylor*..... 144
Astronomical constants 216
dates, The civil and, *R. H. Curtiss* and *Camille Flammarion*.... 207
day, The beginning of the, *Joel Stebbins*..... 206
civil and the, *Oscar E. Dustheimer*..... 137
fellowship, A new..... 355
phenomena in 1918..... 49
problems, A graphical solution for common, *Jerry H. Service*.. 611
research, Co-operation in..... 355
symbols 352

Astronomy in the Smithsonian report for 1916..... 78
Lessons in..... 284
on human thought, The influence of, *Hector Macpherson*..... 699
Prizes in..... 352
Relativity in, *W. Carl Rufus*..... 160
The society for practical..... 585
Young's lessons in, *Anne S. Young*..... 351
Atmospheric haze causing twilight effects, *A. E. Douglass*..... 696
Aurora of April 5, *Anne S. Young*..... 351
John C. Duncan..... 350
August 15, *Lewis J. Boss*..... 658
March 7, The, at Des Moines, Iowa, *D. W. Morehouse*..... 279
at New Bedford, Mass., *Vincent Francis*..... 278
at Northfield, Minn., *H. C. Wilson*..... 277
at Peru, Neb., *W. F. Hoyt*..... 279
bright, *John C. Duncan*..... 350
great, *E. E. Barnard*..... 377
May 16, 1918, The, *John C. Duncan*..... 506
spectrum, Observations of the, *V. M. Slipher*..... 8
Bailey, S. I., Note on the magnitudes of the variables in Messier 15 (abstract) 683
Barnard, Edward Emerson..... 1
Barnard, E. E., A brilliant new star..... 489
Nova Aquilae No. 3 (abstract)..... 684
On the reported naked-eye observations of Nova Aquilae III previous to 1918, June 8..... 558
Some remarkable small black spots in the Milky Way (abtract)..... 685
The Gegenschein in the first half of October..... 561
great aurora of 1918, March 7..... 377
The prominences of the total solar eclipse of 1918, June 8, (abstract)..... 684
True greatness (Poem)..... 146
Barns, C. E., Evening in Santa Clara valley (Poem)..... 165
Galileo (Poem)..... 80
Bartlett, Arthur K., The coming solar eclipse..... 361
Baxter, Benjamin O., Is the sun due to explode..... 112
Beneath midwinter's starlit dome, *Charles Nevers Holmes*..... 2
Binaries, γ *Phoenicis* and σ *Puppis*, Spectrographic..... 214
Binary, Boss 1275, The spectroscopic, *J. B. Cannon*..... 689
stars, The spectral classification of 3919 visual, *Robert G, Aitken*..... 635
Boss, Benjamin, Real stellar motions (abstract)..... 686
Stellar luminosities and absolute magnitudes (abstract)..... 687
Systematic corrections to and weights of stellar parallax (abstract)..... 686
Boss, Lewis J., Aurora of August 15..... 658
Bouget, Henry, A brilliant new star..... 493
Britt, A. L., The eclipse at Corona, Colorado..... 657
Brush, Judson W., A bright meteor..... 208
Bunch, Sterling, Three bright meteors..... 584
Calendar, A proposed change in the..... 426
Campbell, Leon, The light curve of Nova Aquilae, No. 3 (abstract)..... 687

Campbell, W. W., The Lick Observatory eclipse instruments 356
Canicula, *Charles Nevers Holmes* 359
Cannon, Annie J., The spectrum of Nova Aquilae, No. 3 (abstract) 688
Cannon, J. B., The spectroscopic binary, Boss 1275 (abstract) 689
Canopus as seen from Florida, *Jennie Lynne Kyle* 100
Celestial bodies, Rotation of 721
objects for common telescopes 143
Chains which are invisible, *Charles Nevers Holmes* 547
Cincinnati Observatory publication No. 18 213
Civil date by astronomers, The proposed adoption of the, *Albert S. Flint* 137
Clock, A "siderail" 428
Clocks, A short method of utilizing coincidence of beats in comparaing and setting, *Charles Clayton Wylie* 23
Cloud conditions along the path of totality, 1918, June 8, as determined by local observations, 1912-17, *David Todd* 111
Coincidence of beats in comparing and setting clocks, A short method of utilizing, *Charles Clayton Wylie* 23
Comet *a* 1918, New 494
b 1916 (Wolf) Ephemeris of, *H. M. Jeffers* 200
1905 II Borrelly's periodic 582, 718
Elements of 582
Ephemeris of 582, 720
(or asteroid?) Wolf, New 199
rediscovered, Encke's, *Edward C. Pickering* 123
Rediscovery of Wolf's periodic 495
Comets in 1917, Discovery of 423
The origin of, *Elis Strömgren* 509
Companion to *The Observatory* 139
Conrad, Wm. A., A brilliant new star 492
A short method of mean place reduction with natural numbers (abstract) 689
